Software engineer | Scrum Master

Passionate by computer science since the end of middle school, I particularly like to be attentive to user interfaces (UI), by adding details but also by suggesting intuitive solutions (drop-down list, predictive text, etc.). Solicitous of remaining versatile, I always seek to practice my technical and functional (needs analysis and customer / Product Owner support especially) skills.

Experiences

Sopra Steria
March 2021 - Today
Software Engineer | Scrum Master

Facilitation of the Scrum rituals, team self-organization and agile process continual improvement
